Bolas sem escalas - крайне динамичная аркада с нон-стоп геймплеем. Игра является современной вариацией старых арканоидов, в которых необходимо с помощью выстрелов шариками уничтожать блоки. you have to do that that самое, однако все клетки движутся вниз с огромной скоростью, и в каждый фрагмент нужно попасть определенное количество раз, поэтому для их уничтожения придется попотеть. Преимуществом игрока будет возможность стрелять огромным количеством шаров, которые к тому же могут модернизироваться по ходу прохождения. PUBG mobile, ChronoBlade or Shadowgun Legends are no strangers to the current gaming community. These are the most attractive and competitive action games in the entertainment industry of all time. These games are fascinated by simple gameplay, sharp graphics or the experience it brings. In addition, other genres such as Arcade are equally influential. Although the game is very light, there are simple games, but what they bring is perfect. Today I will introduce you to a beautiful game called Non-Stop Balls – a tactical shooting game that you can't ignore. How to play Your mission is to participate in the game just by tapping the screen and moving your finger continuously. On the screen will appear a cannon and blocks of various shapes. Cannonballs will fire the balls, while the blocks will carry a specific weight by moving from above the screen toward your cannon. You will tap the screen, redirect the cannon to shoot the balls at the rocks. A rock is destroyed when its weight is gone. However, these rocks move at a high speed with dense density, so you need to hit the correct firing lines and then let the balls collide with them as much as possible. Multi-ball system Try to shoot as many stones as possible to score high points. Your points will match the amount of bonuses you receive; you can use this amount to buy new ammo. Each type of ammo will have different shapes and different effects. Yellow bullets, for example, are smaller in size than white bullets, faster firing speed, and more beautiful effects when the ball hits blocks of stone. There are many different types of ammo for you to choose from, join and explore now! Temporary NonStop Balls is an addictive shooting game. Although only with 2D graphics is designed very simple, easy to play, but can leave you immersed in the game all day without even boring. The volume of the game is quite low; The graphics are not too heavy to fit on most types of machines, giving you the smooth experience without worrying about the status quo lag.
